

DEFCON Cybersecurity Fest Zone Proposal

1. Zone Idea

Zone Name: Hacking Arena

An immersive cybersecurity experience where participants witness and understand real-world cyber attack techniques through live demonstrations, interactive stations, and guided learning. The zone simulates how attackers compromise online identities using social engineering, phishing, session hijacking, and anonymity tools.

2. Workflow

Each batch lasts 3 hours and follows a structured experience:

Phase 1 – Live Hack Demonstration (0–30 min):

- Live simulated Google account takeover
- WhatsApp Web session hijacking demo
- Instagram account compromise demonstration

Phase 2 – Attack Explained (30–75 min):

- Breakdown of phishing and session theft
- Explanation of attacker workflows and infrastructure
- Interactive analysis of fake login pages

Phase 3 – Interactive Stations (75–135 min):

Participants rotate through four stations:

1. Phishing Infrastructure Lab
2. Dark Web & Anonymity Demo (Tor/I2P)
3. Mobile Camera Phishing Simulation
4. Social Media Attack Analysis

Phase 4 – Finale & Defense Strategies (135–180 min):

- Red Team vs Blue Team simulation
- Security best practices and prevention methods
- Q&A and learning summary

3. What Things Are Needed

Technical Requirements:

- 3–4 laptops (Presenter + Stations)
- Projector
- Dedicated WiFi hotspot/router

Logistical Requirements:

- QR code printouts
- Microphone and audio system

4. Budget (If Needed)

Estimated Budget (Minimal Setup):

- Printing & Posters: ₹500
- Misc: ₹500

Total Estimated Budget: ₹1,000

5. Volunteers Needed

Total Volunteers Required: 7–9

Roles:

- Zone Lead (1) – Main presenter and coordinator
- Technical Operator (1) – Runs live demos
- Station Leads (4) – One per interactive station
- Crowd Managers (2) – Movement and coordination
- Technical Backup (1) – Troubleshooting support

6. Participant Capacity

Participants per Batch: 80-100

Total Daily Capacity (3 batches/day): 300–600 participants.
